# SEA READER EBOOK LIBRARY

Digital Library for Nautical ebooks

Digital  
Publications  
Library

Reduced onboard admin

Ease of Use

IMO and flag state approved

Ebooks from IMO, ITU & many other publishers

ToddNav SeaReader provides a full digital technical library for maritime use. It provides all of the books needed on board and in a fast, easy to use, digital format.

It eliminates the associated costs and administration of maintaining a paper library as all the data is on the vessel. The entire library is easily updated with one click of a button when the internet is available.

A single licence allows access to the software on two separate PCs.

In the event of a vessel inspection, SeaReader makes it easy to ensure compliance by having all mandatory publications onboard. A Supply Certificate is easily accessed for inspections. SeaReader can also be used in the Ship Manager's office, two separate PCs per licence.

## Reduced onboard administration

ToddNav SeaReader keeps the administrative work on board vessels to a minimum as the latest set of publications will always be available on board and constantly kept up to date.

SeaReader provides total visibility of what non-ADMIRALTY books are on board the vessel. This gives you complete confidence the vessel is compliant by having the latest mandatory publications on board at all times.

The shipping costs, time delays and administration associated with maintaining a paper publications library are removed – there are no physical books to ship and the entire digital library is updated with the click of a button.

## Tesimonial

*Having ebooks onboard our vessels has many advantages: from easy access to mandatory publications, a quick search facility, effortless updating and the elimination of transport costs for paper copies, we are pleased to have moved to ToddNav SeaReader*

**Captain Dave Elliott**  
Marine Superintendent – Arklow Shipping

## Ease of Use

Its streamlined design is simple and easy to use with one-click updating and filtered search results among many other easy to use features. All data will already be on the vessel so new eBooks are accessed easily.

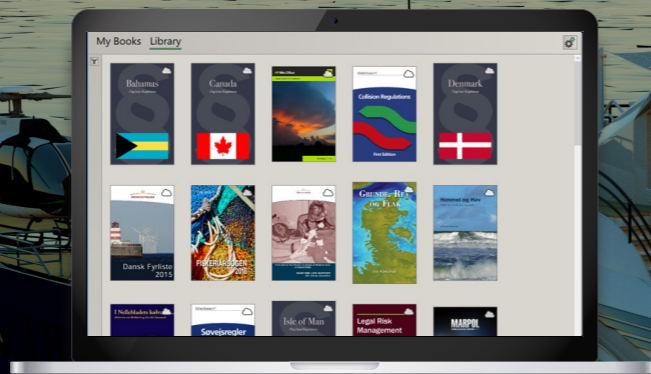

Updates and amendments to publications are highlighted and distributed automatically, ensuring the latest copy is always available.

There is no need for an internet connection to use SeaReader - you can get permits for books either online or offline.

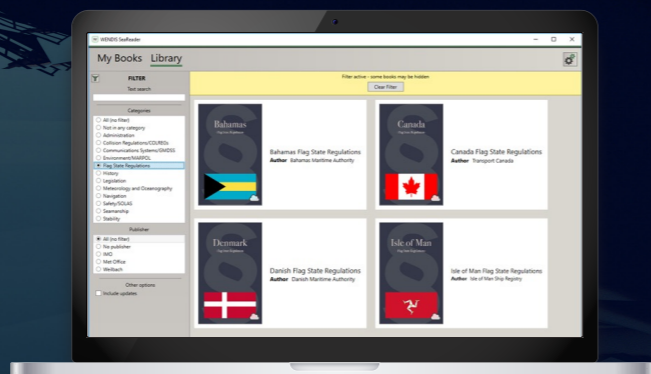

## Library View

Displays all books available for purchase.

## Search Functionality

Search for the book you need by typing a word or use the filtering option.

## Key Features

Full digital technical library

The books you need in digital format

Reduces admin time on board

Zero shipping costs associated with paper libraries

Increased compliance on board

Quick, responsive system

Easy to update

Filtered searching
